PROFESSIONAL SUMMARY

Fullstack Software Engineer with over 1 year of professional experience designing, developing, and deploying end-to-end web applications. Specialized in the PERN stack (PostgreSQL, Express.js, React.js, Node.js), REST API design with JWT authentication and role-based access control (RBAC), and process automation with Python. Proven track record leading ERP data migrations in mission-critical environments and reducing incident resolution time by 35%. Currently pursuing a B.S. in Software Engineering. Available for remote or hybrid roles.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL

Frontend: React.js, Vue 3, HTML5, CSS3, Material-UI, Context API, React Hooks, Pinia

Backend: Node.js, Express.js, FastAPI, Django, REST API Design, JWT Authentication, RBAC

Databases: PostgreSQL, MySQL, SQL Server, Prisma ORM, Query Optimization, Data Modeling

DevOps & Tools: Git, GitHub, Docker, Railway, Vercel, CI/CD basics, Environment Variables

Integrations & Automation: SMTP/Email APIs, Nodemailer, Python Scripting, ERP Data Migration

Methodologies: Agile, Scrum, Kanban, Code Review, Technical Documentation

WORK EXPERIENCE

Systems & Software Engineer — Inversiones Farmashaio

January 2025 – Present | Bogotá, Colombia

- Designed and developed a Ticket Management System (SGTS) from scratch using the PERN stack (PostgreSQL, Express.js, React.js, Node.js), reducing average internal incident resolution time by approximately 35%.
- Implemented JWT-based authentication with role-based access control (RBAC) across all REST API endpoints, securing the application against unauthorized access.
- Built an automated email notification system using SMTP and Nodemailer with state-change triggers, eliminating manual ticket tracking.
- Led the audit and migration of critical data to a new ERP system, processing over 5,000 records using Python scripts for cleaning, validation, and loading, with zero data loss.

Technical Operations Coordinator — Itac Colombia

September 2024 – January 2025 | Bogotá, Colombia

- Coordinated route and resource assignment for field technical teams, optimizing response times for network installations by 20%.
- Digitized operational expense and technical asset tracking, achieving full project budget traceability.
- Monitored SLA compliance on client deliveries, maintaining a compliance rate above 90%.

Software Developer / IT Support — Freelance & IT Support

September 2023 – January 2025 | Bogotá, Colombia

- Developed Python automation scripts for clients, reducing manual processing time and eliminating repetitive tasks.
- Provided preventive and corrective hardware/software maintenance for corporate and personal clients.

CEO & Web Developer — Girouette Perfumería

February 2022 – September 2023 | Bogotá, Colombia

- Developed and optimized the company e-commerce platform, managing catalog, basic SEO, and user experience.
- Negotiated with strategic suppliers to diversify the product catalog, increasing average order value.

KEY PROJECTS

FarmAnalitics — Business Intelligence Platform for Pharmacy Chains

Stack: FastAPI, Pandas, Vue 3, Pinia, ApexCharts, Railway, Vercel

- Built a serverless, in-memory fullstack application that converts CSV/Excel sales, purchasing, and inventory files into actionable KPIs, processing over 45,000 rows without a persistent backend.
- Developed 8 analytical modules including Health Score, product profitability, branch comparison, and goal projection with three scenarios. Demo: <https://farm-analitics.vercel.app> | GitHub: <https://github.com/Julian-Enable/FarmAnalitics>

LMSMulticentro — Enterprise Learning Management & Knowledge Base System

Stack: React 18, TypeScript, Node.js, Express.js, Prisma ORM, PostgreSQL, JWT, Railway

- Developed an enterprise LMS with dual consumption modes (sequential course training and direct topic access), intelligent search by code/title/tags, and multi-platform video support (YouTube, Drive, Vimeo).
- Implemented navigable video timestamps, an RBAC admin panel, and a versioned REST API with Prisma ORM for reproducible migrations. GitHub: <https://github.com/Julian-Enable/LMSMulticentro>

SGTS — Ticket Management System (Farmashaio)

Stack: PostgreSQL, Express.js, React.js, Node.js (PERN), JWT, Nodemailer

- Centralized internal technical support, reducing average incident resolution time by approximately 35% with JWT and RBAC securing all REST endpoints.
- Delivered automatic SMTP notifications on state changes and a real-time admin panel with filters by status, priority, and assignee. GitHub: <https://github.com/Julian-Enable/sgts-farmashaio>

EDUCATION

B.S. in Software Engineering — Universidad Manuela Beltrán

2021 – Present (8th semester) | Online

Technician in Computer & Network Maintenance — CET CAFAM

2017 – 2019 | Cisco Packet Tracer, IPv4/IPv6

CERTIFICATIONS

- Python & Django Specialization — Netzun, 2023
- Introduction to Cloud Computing — Netzun, 2023
- SQL Server 2008–2019 Administration — Udemy, 2023

LANGUAGES

Spanish — Native | English — Technical / Professional Reading
